

Description

Hydro Pneumatic Spin-Pull Nut Insert Installation Tool M4 – M8

The KJ44LS is the FAR® hydro pneumatic tool for production installation of nut inserts up to M8 in any material, specifically Plus Nuts due to its extra-long 16mm stroke. This tool is ideal for setting high volumes of inserts requiring a very long stroke and is near essential for Plus Nuts in all materials. It offers the ability to set Plus Nuts in one stroke rather than rely on the user to double stroke similar tools, or to use much slower spin/spin tooling. This tool is supplied in kit form which includes hard plastic case, and all mandrels and anvils for setting M4 to M8 inserts.

Specifications

Model	TA-KJ44LS
Type	Spin/Pull
Construction	ABS Plastic/Steel
Capacity	M4 – M8 All Nut Insert Materials
Traction Power	19.00kN @ 6bar
Stroke Length	16.0mm
Weight	2.92kg
